Nature of Complaint:

OPPOSED \*\*\* E-01345A-10-0394, E-01345A-12-290, E-01933A-12-0296, E-04204A-12-0297 \*\*\* ELECTRIC

To whom it may concern, on behalf of the thousands of people who have invested in Solar Roof Top Energy Panels

All of us who have invested in Roof Top Solar Panels have done so to conserve energy, save money, improve the environment and donate good will to the earth. I believe that the Commission has in the past approved an additional monthly fee on residential solar homes to offset the "losses" that the utilities claim they have incurred because of the efficiency of their solar customers. AND NOW the Commission is considering reducing the energy credits that we solar homes were told we would get when we entered into the solar roof top world. Those credits were promised to us by APS and we took those promises in good faith. I oppose the reduction in credits as do the many residents in Sun City Festival who have invested in the roof top solar systems. What in God's name is the Commission thinking. This is Arizona, the land of Sunshine and it should be the Solar State. The Town of Buckeye has even installed a sign at the entrance of Sun City Festival that reads, Buckeye a Solar City.

The article in today Republic business section is laughable in that there is a statement made by Jeff Guldner asserting that the customers without Solar are actually paying for the credits to the solar customers. Excuse me!!! We who have solar systems are sending energy to APS, etc. That we have collected and for which APS has not had to generate. SO, it I may be so bold I assert that we solar customers are paying for the electricity used by those who don't have solar. I would venture a guess that APS etc. are more concerned about their bottom line profit than the poor non solar customers and those of us who have solar system.

I have written this in haste and in a very upset frame of mind. I need to rethink my wording and fine tune it for an eventual submission to the Republic and the various elected officials in the State, who may have more influence on the Commission that a home owner who thought he was being conscientious and frugal by installing roof top solar panels.
